

LakeEZE[®]
BY KROEGER MARINE

Ladder[®]

HAND-CRAFTED, AMERICAN MADE

Built for Life on the Water

Ladder[®] Patent #987,118

The next generation LakeEze[®] Ladder[®] brings modern **design**, **customization**, and **innovation** to the forefront of lakeside accessories.

Key Features:

- 1 Exclusive **patented** design provides easier, safer access to and from dock
- 2 With a 42 degree **gentle slope**, it has the same rise and run as the stairs in your home
- 3 Tall grab rail with tall side hoops for added stability
- 4 Reversible ladder handrail side with the option to have one or two handrails
- 5 Stable sitting surface in the water with 350 lb (5-Step), 300 lbs (6-Step) weight capacity- load cycle tested 28,000+ times with no failures
- 6 High-quality aluminum ladder and handrail design with stainless steel hardware and brass nuts, all rust-resistant
- 7 **EzePull Technology** allows the ladder to easily rotate into the stowed position with minimal effort requiring only 40 lbs of pull force for a 5-Step, 60 lbs of pull force for a 6-Step and is rated for 10,000+ cycles
- 8 Ladder mounting ties into frame or spans many boards to prevent damage to decking
- 9 Steps are made of high strength glass-filled nylon with a gentle, non-skid surface, perforated to reduce drag, making lifting easier, and come in a variety of UV resistant colors
- 10 Easy to follow installation instructions
- 11 Ideal for **all ages** and furry friends

Dimensions:

- **32"** wide from outside of dock handrails
- Ladder width of **27 1/2"**
- Tread depth of **11 3/4"** with **1 3/8"** of overlap
- Riser height of **9 1/2"**

OPTIONS:

5-Step Version:

- **86"** tall at the peak of its rotation
- Bottom step is **44 3/8"** below the deck height

6-Step Version:

- **101"** tall at the peak of its rotation
- Bottom step is **53 7/8"** below the deck height

HOW MANY STEPS DO I NEED?

Measure the distance from the top of your dock to the water line.

- **5 Step:** Less than **19"**
- **6 Step:** **19"** and greater
